PET Carlisle Inc.

Saturday, June 25, 10am – 2pm

There is something new and exciting happening in the center city of Mt. Holly Springs. It involves power tools, pets, smiling volunteers and a stated mission to make someone in the third world countries happy. **Are you curious yet! Good! Read on...**

In the old Pennsylvania Dutch Candy factory, right behind the Sheetz store, we are assembling PET's, which stands for Personal Energy Transportation (not an animal). This is a three wheeled, hand driven wheel chair. PET Carlisle Inc. is one of 26 shops affiliated with PET International.

PET was the dream of a missionary named Larry Hill. While based in Africa, Larry saw disabled people forced to crawl or slide through dirt and rocks every day. Enraged by this travesty, he partnered with an American airplane mechanic, and voilà! The PET was born.

With its wide base, large cart in the rear, and ability to handle rough terrain, the PET vehicle has made mobility possible for thousands of disabled people around the world. PET Carlisle, which is purely run by volunteers and donations, has also built over 70 PETs this year and sent 28 of them to the Ivory Coast in Africa. **Good things are happening in Mt. Holly so don't miss out!**
